About Me

I am a third-year Information Science student at Addis Ababa University with a strong interest in mathematics, algorithms, and technology. Through my coursework in mathematics, applied mathematics, statistics, and data structures, I have developed solid problem-solving skills and a passion for applying theory to real-world challenges. I am eager to expand my knowledge in artificial intelligence, physics, and programming by working on innovative projects. As a motivated and fast learner, I am committed to contributing my dedication, creativity, and curiosity

Language

- English

Experience & Projects

C++ Projects
Built a Calendar Application using structured programming concepts.
Developed small programs applying arrays, loops, and functions for problem solving.

Web Development Projects
Designed and developed E-commerce prototype and static websites Focused on responsive layouts and user friendly design.

Python Project
Implemented tokenization, stemming, and text operations to extract and organize relevant data.
Applied problem-solving and logical design for data handling

Mathematics Tutoring
Provided tutoring in mathematics and applied mathematics to university and high school students.

Education

Addis Ababa University
Addis Ababa, Ethiopia
- Bachelor of Science in **Information Science** (3rd Year Student)
- Expected Graduation: 2026

Relevant Courses:
Mathematics, Applied Mathematics, Statistics, Data Structures & Algorithms, Programming Fundamentals

Skills

- **Mathematics & Algorithms:** Problem-solving, Pure & Applied Math, Probability, Statistics

- **Programming & Tools:** C++, Python , HTML, CSS, JavaScript (React)

- **Physics Knowledge:** Classical Mechanics, Quantum Physics (academic knowledge)

- **Soft Skills:** Research, Critical Thinking, Teamwork, Communication, Adaptability, Fast Learner
